

**LONDESBOROUGH with
EASTHORPE
Parish Council**

**Emergency
Procedures**

Emergencies like road accidents, fires and medical emergencies happen somewhere in the country almost every minute of every day and are dealt with quickly and efficiently by the emergency services.

East Riding of Yorkshire Council (ERYC) and other responding organisations have emergency plans in place for larger events that stretch the resources of the emergency services and affect large numbers of people or the environment.

How Town & Parish Councils will be notified of an Emergency

Town and Parish Councils will always be notified about a declared emergency that they will be affected by. The type of notification will depend on the type of emergency and is outlined below. Elected Members will also be notified in the same way.

- In the event of a localised emergency that impacts on one or a small number of towns or parishes, the clerk will usually be telephoned by the Head of Service who is co-ordinating the Council's response to the emergency. The Head of Service will be known as a Control Centre Manager when they are in this co-ordination role.
- In the event of a wide area emergency that impacts on many wards across the East Riding of Yorkshire, initial notification is likely to come from an email sent from '*alertparish*', the Emergency Planning team or from the Emergency Control Centre.
- If you have signed up for our text alert service you may also be sent an SMS with information. Texts will begin with **EmgncyAlert**, you will not be able to respond directly to these notifications but if you have any questions please contact the Customer Service Centre.

There is often an information vacuum at the start of an emergency, with responding organisations trying to ascertain exactly what has happened and what the consequences are. However, the notification will take place as soon as possible after arrangements have been put into place to implement the Council's response to an emergency.

Communicating with Town and Parish Councils during an Emergency

The Town and Parish Council emergency hotline will usually be the primary point of contact for you during an emergency. Information about the emergency response will be cascaded by the Emergency Control Centre, and the switchboard will be able to direct any queries or issues towards the appropriate Council teams. It is likely that to take some time to respond to enquiries during the initial stages of an emergency.

The Council's website will also be fully updated with information during an emergency.

Cllr Michael Stathers	07802 187614	mikestathers@yahoo.co.uk
Cllr Leo Hammond	07761 992815	hammond@eastriding.gov.uk

Severe Weather Contingencies

This section, attached as an Appendix, describes the resources available to deal with winter weather in Londesborough parish, and the processes for using the parish council's resources to deal with severe winter weather.

The Chairman of the Parish Council or the Vice Chairman (in both their absences The Clerk) will notify the Parish Council of warning notices received from ERYC.

In periods of prolonged ice/ snow then members of the Parish Council will inform the Chairman of particular risk areas noted by them or residents.

Salting Routes

Full details of the ERYC Salting Routes can be found on the ERYC website.

www.eastriding.gov.uk/winter or by telephone (01482) 393939

For the Londesborough area these can be summarised as follows:-

Precautionary Network (Roads routinely treated in case of ice and snow)

The A164

Secondary Network (Roads treated when ice is forecast to be present after noon)

From the A164 roundabout along the Londesborough to Burnby Road running through the parish, and round the village via Love Lane and Low Street

Grit Bins

Grit bins provided and maintained by ERYC are situated at the following locations:-

At the junction of Market Weighton Road and Shiptonthorpe Road

At the junction of Top Street and Howgate Lane

Near the Church

The Parish Council has provided and maintains additional grit bins to supplement those provided by ERYC. These additional grit bins are located at the following positions, approved by ERYC:-

Outside Stable Court

At the entrance to Londesborough village.

Members of the Parish Council will monitor salt levels in these additional bins and report low levels to the Clerk. The Clerk will make arrangements on behalf of the Parish Council for these grit bins to be filled as required.

The Parish Council has provided a stock of salt available for residents to use on paths and areas not covered by the ERYC salting routes.

A towable salt spreader is also available. It is for use behind the private vehicle of delegated drivers who have provided evidence to the Chair or Vice-Chair of the council that they have appropriate cover on their motor insurance.

Community Public Access Defibrillator

A Defibrillator is located on the porch of the Concert Hall on Top Street, Londesborough. The code for unlocking the cabinet is obtained by dialling 999.

A volunteer regularly checks that on the cabinet and device. In the event of it being used this person will be contacted to arrange for replacement pads.
